

FIRE ALARM SYSTEM WARNING LABELS

**TRY OUR AFFORDABLE FIRE ALARM LABELS THAT SAY IT LIKE IT IS.
LET US HELP YOU BE IN COMPLIANCE BY USING OUR NEW SELF ADHESIVE LABELS TO
MARK YOUR JUNCTION BOXES, A.C.DISCONNECT AND RJ31x JACKS.**

CAUTION!
A RJ31X line-seizing telephone jack is being utilized by a life-safety system.
THE STATE FIRE MARSHAL PROHIBITS TAMPERING WITH THIS DEVICE OR INTERFERING WITH ITS LINE-SEIZING OPERATION.
If you're not trained in its use and function, then call your supervisor before proceeding.
www.firealarm.org

THIS IS A LINE-SEIZING RJ31X PHONE JACK REQUIRED FOR LIFE-SAFETY SYSTEMS.
If you are not familiar with its use nor trained in its function, then put the screwdriver down and **BACK AWAY!**
Then call your supervisor.
www.firealarm.org

RJ31X Telephone Jack Warning Labels: Eliminate service calls to repair phone wiring that has been changed back to home run by "helpful" telco employees. These labels may be installed on your jack boxes or outdoor on residential and commercial demarcation boxes. The standard pair of 'nice' labels start: CAUTION. We ship the CAUTION labels unless you wish to be 'naughty' and choose the BACK AWAY version. You decide.
(Each one is 1.75" x 1.75")

THIS BOX CONTAINS

IDC NAC SLC

Fire Alarm Wiring

AUTHORIZED PERSONNEL ONLY!

www.firealarm.org

Junction Box Stickers:
Throw away the red paint! Use these labels to positively indicate that the j-box contains fire alarm circuitry. Use the blank squares to indicate the *type & quantity* of each fire alarm circuit.
(Each 2 X 3.5")

WARNING!

Fire Alarm Connections! Operating valves may cause Fire Department Response!

Obtain authorization before proceeding.

www.firealarm.org

A.C. Disconnect Label: The use of red nail polish to paint circuit breakers is discouraged since the paint may enter the breaker and cause problems. Impress your customer and inspectors by using a label made for the purpose. Simply trim off one end of the arrow to use on either the left or right side of the breaker panel.

(4 x 5.5" Each)

Sprinkler Warning Labels: Use these bright red labels to warn sprinkler contractors or building owners that they must notify the fire department and your monitoring company before turning any valves. This will help reduce needless dispatches due to inadvertent alarm signals. Just insert into clear sleeve included and tie-wrap to valve.

(.5 x 3.5" Each)
